

Medical Imaging Sciences

Sarah-Joy Stevens

Submitted by Bruce K. Oda

The Medical Imaging Sciences Department is honored to announce Ms. Sarah-Joy Stevens as the Outstanding Student and recipient of the Edward Mallinckrodt Award of Excellence in Radiography for 2025!

Sarah-Joy has earned a 4.0 GPA during her tenure in the radiography (RT) program. To earn straight “A’s” in every course within the program is no easy feat, as she also completed 1650 clinical internship hours during the two-year RT program.

Throughout the RT program, Ms. Stevens has been professional, respectful, and self-effacing. Sarah-Joy was elected by her peers to be the class representative. In her spare time she supported her classmates throughout the program with structured study groups in preparation for the national exam. Sarah-Joy’s characteristic qualities of compassion and caring in the service of others makes her a deserving recipient for both prestigious awards.

Upon successful completion of the national radiography exam, I will be honored to refer to Ms. Sarah-Joy Stevens as a colleague in our profession with her earned title as a “Radiologic Technologist”!
