- Engineering and Computer Science Live Transfer Information Sessions

Our sessions are held twice a month on Fridays at 2pm with a Viterbi Admission Counselor. Our current engineering students are also hosting live chats every other Sunday at 7pm to share their student stories. Future events will also include faculty roundtable discussions with professors and department heads. You and your students can find the registration to these events at viterbi.live/events. The recordings for past events are also posted here! Additionally, you and your students can check out our Viterbi Voices podcast and read more about student experiences at viterbivoices.usc.edu, a student-run website that blogs diverse student stories in Viterbi. Finally, if you have any prospective Engineering or Computer Science transfer students that are interested in meeting with us individually to discuss their transfer plans, they can email us at vadmit@usc.edu and we will schedule a counseling appointment.
